## Elevator Car Sterilization and Purification Fans

Elevator Car Sterilization and Purification Fans have been installed in all elevator cars throughout property. These fans feature proactive air purification technology that minimizes airborne viruses safely using ionization as well as UV lighting to sterilize the air as it passes through.

The Elevator Purification Fan system generates negative ions.

The ions attach to viruses, bacteria and other microbes, causing a chemical reaction that degrades them.

Harmful pathogenic microbes are neutralized, reducing the spread of airborne infection.
